

This is what living in Enchantment is all about.

Completed in March 2010 by DeTar, it is nestled high in the back of this fabulous resort to make the most of privacy. Specifically designed to maximize views for ideal indoor/outdoor living, it faces the spectacular mountains to the East, sunrises and sunset are unmatched with sweeping views from both inside the home, or relax, on one of the resident's numerous patios. It simply doesn't get any better in Sedona. Structurally the home was constructed with 400 amp service for all your electrical needs, a hidden 5.6KW solar array designed by APS for supplemental power generation, an elevator, four fireplaces, workshop areas and much more. Heating & A/C is zoned throughout and is, of course wired extensively for all cable, telephone, security and camera requirements. With all said, it also includes numerous Enchantment benefits of resort living, access to all pools, tennis courts and restaurants.
